

Product Information

Overview:

This unique cabinet innovation has been specifically designed to bring unrivalled advantages to **Free Standing Cabinets** and will offer a number of benefits to ultimately **“reduce the total cost of ownership”**

ACCESS is the first cabinet designed to solve the problems of today's networking environment.

ACCESS provides unique working and cabling accessibility to totally transform cabinet installation layouts, on-site installation time and on-going system management.

Summary of features and benefits:

- Totally open construction for ease of cross-patching.
- Reduced installation time.
- Network installations made easy.
- Maximum useable space.
- Emphasis on security.
- Unrestricted top and base cable entry
- Unrivalled accessibility and all round cable management.
- Suitable for server and / or cabling applications.
- Wide product portfolio.
- Enhanced cabinet thermal management.
- Flexible internal cabinet configuration to allow for a mix of active and passive components.
- Cabinet doors, side panels and top panels can be added or removed with ease to assist with cabinet configuration and transportation.
- Simplified cabling between cabinets when bayed together.
- Aesthetically designed for office environments.

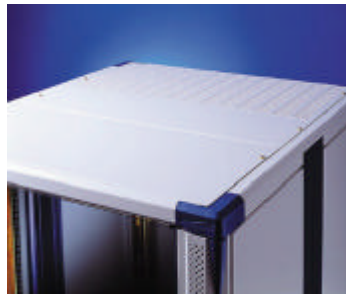

Construction Features:

- The cabinet offers efficient installation utilising tubular end frames linked by a heavy-duty central extrusion. This construction eliminates the need for the more traditional four corner uprights on conventional cabinets.
- The tubular end frames provide maximum cable access through the top and bottom of the cabinet.
- Quick release, lockable doors provide high security.
- Two removable panels per cabinet side assist on site personnel.
- The internal mounting angles (front and rear) are fully adjustable to simplify cable and equipment installation.
- Interchangeable top panel combinations including fan trays, ventilated panels, gland plates and open access to meet the specific needs of your customers.

The total modular solution

Unique top and bottom tubular frame, connected by aluminium extrusions (UK and World-wide Patents Pending)

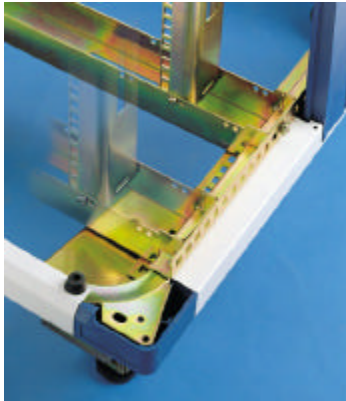

Standard top panel arrangement with options available:

- Plain
- Fully vented
- Fan tray / trays
